

# Proving 5 Mi meter suitability of AMI System

Real Life setup of 5 Mi million meter through simulator and demonstration of several AMI scenarios. Metric reporting and evidences of system performance through profiling and observability solution. Successful demonstration and certification was achieved

## Highlights

- Design of the real-life scenario setup with usage point, devices, profile data
- Home grown simulator with exact meter model and push setup and pull setup
- Infrastructure sizing & setup on the Cloud with all applications
- 'Datadog' used for deep Metrics capture
- Additional Instrumentation/metering added on the application where there were gaps.
- Multiple trial runs before final run with PGCIL team.
