

# Empowering leading Meter manufacturer to provide AMI services on SaaS

The solution had a significant impact in the business model and revenue stream generation for the Customer.

## Highlights

- Customer Operations Team empowered to manage the full setup
- Scaling fast with more than 10 projects and 15K meters in short time.
- Multiple meter type integrations from different providers
- Integration with leading MDMs for residual primary market and franchises
- Software Licensing model on Taksa , underpinning infrastructure managed by customer
