

# Establishment Of Data Ops Platform- Global Confectionery

## Industry 4.0 Platform for one of the largest manufacturer of confectionery and chewing gums

- 1 First win Globally on the FT Data Mosaix platform
- 2 Pilot line Implementation is successfully completed & organically growing with multiple use cases across multiple plants. Currently working on a Plant Scale Material Reconciliation @ Plant 1. Another use case for a Multi-Line Packing Efficiency Analytics @ Plant-2 is WIP
- 4 AI agent to diagnose performance insights for optimizing performance of key equipment with respect to productivity and energy consumption and maintenance optimization

Signed Off Success Metrics

OEE improved by 3%

Scrap Reconciliation improved by 5%

Energy optimized by 10%

### Use Cases Delivered...

-  Line Performance and Productivity Analysis
-  Equipment Specific Performance
-  Downtime and Root Cause Analysis
-  Energy Performance
-  Batch Production and Performance
-  Material reconciliation and wastage reduction
-  Product Quality and Controls
